**User Manual:** *Acceptance Checkbox*

## Acceptance Checkbox

You may wish to allow users to submit your contact form only if they accept certain terms. In such cases, a form tag `acceptance` will be useful.

The process is simple. Just insert an `acceptance` tag into your form like this:

```
[acceptance accept-this] Check here if you accept these terms.
```

Due to JavaScript magic, users won't be able to press the submit button without first checking the box to accept your terms. In addition, you can invert it with an `invert` option, i.e. allowing users to submit only if they uncheck the checkbox.

Option	Examples	Description
<code>id:(id)</code>	<code>id:foo</code>	<code>id</code> attribute value of the input element.
<code>class:(class)</code>	<code>class:bar</code>	<code>class</code> attribute value of the input element. To set two or more classes, you can use multiple <code>class:</code> option, like <code>[acceptance accept-this class:y2008 class:m01 class:d01]</code> .
<code>tabindex:(num)</code>	<code>tabindex:10</code>	<code>tabindex</code> attribute value of the input element.
<code>invert</code>		Allow users to submit only if they uncheck the checkbox.
<code>default:on</code>		Check the checkbox by default.

Available options for acceptance
