**User Manual:** Add Form to Post Content

## How can I add a contact form into my post content?

Open the settings page for Contact and then open the contact form you want to add.

Each contact form has its own tag (shortcode), such as `[contact-form-7 id="1234" title="Contact form 1"]`. To insert the contact form into your post, copy the short-code and paste it into the post content.

**My contact form doesn't appear. Instead, a code `[contact-form-7 404 "Not Found"]` appears.**

The code `[contact-form-7 404 "Not Found"]` is a sign that the contact form specified by the short-code (described above) couldn't be found. Make sure you are using the correct short-code.
