User Manual: Adding a Field

How can I add a field to my contact form?

To add a field, add a tag to the Form textarea.

Each tag has a strict syntax, supporting several options (see Tag Syntax).

Learning the syntax might be difficult, but you can easily make a custom tag by using the tag generator instead. Click Generate Tag and simply select the options you're interested in.

A screenshot of a web form editor interface. The title bar says 'Form'. Below it, there's a large text area containing HTML code for four form fields. The code is:

```
<p>Your Name (required)<br />
[text* your-name] </p>

<p>Your Email (required)<br />
[email* your-email] </p>

<p>Subject<br />
[text your-subject] </p>

<p>Your Message<br />
[textarea your-message] </p>
```

 The underlines in the code are red. To the right of the code, the word 'Tags' is written in a large, red, italicized font.
