Apogee Design Support Center
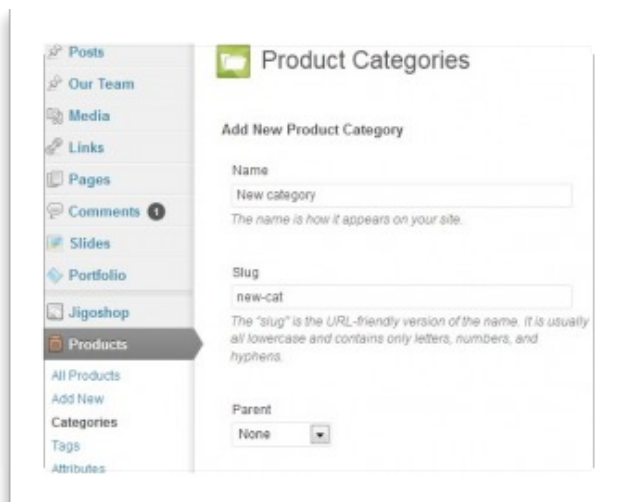

User Manual: *How to Manage Categories*

How to Manage Categories

1. Your products in Jigoshop component can be assigned to the category. In order to add a new category, go to **Products > Categories** in your admin panel

2. Add your new category details to the fields and click on "Add new product category" button.

3. You will notice that the new category has appeared in each products categories list. Match the categories you would like to assign the product for and click on **Update** button.
