User Manual: *Style Manager*

Style Manager

The style manager allows you to customize the appearance of forms without any knowledge of CSS. There are a ton of parameters you can fill out with each style and all of them are pretty self-explanatory. After you create a style, you need to go to the form manager and set the form style to the new style you created (the slug will be what shows in the 'Form Style' dropdown).

The image below will help you better understand how each style option will change your forms.
